

Medical Devices

Customized Support Every Step of the Way

From product development and regulatory guidance to M&A deals, international trade and liability claims, Faegre Drinker knows every facet of your business. Our team — including seasoned trial attorneys, scientists and former regulatory experts with access to other leading minds in the industry — can help you advance and protect your most ambitious business goals.

How Do We Help?

Intellectual Property

Patent prosecution, litigation, licensing and transactions to help clients develop valuable, highly sought-after patent portfolios across a range of technologies

Privacy & Cybersecurity

Privacy program implementation for all businesses from startups to global entities

International Trade

Experienced assistance in the complex challenges of an international supply chain

Business Litigation

False Claims Act, criminal investigations, contract disputes, Qui Tam, non-competes and ERISA matters

FDA

Guidance from industry leaders on navigating FDA regulations and interactions through the product life cycle, including post-launch

Product Liability

Advocate for your company and products, protecting your reputation and business interests even in the most complex and contentious liability cases in bet-the-company litigation, from single plaintiff cases to mass torts and MDLs

Employment

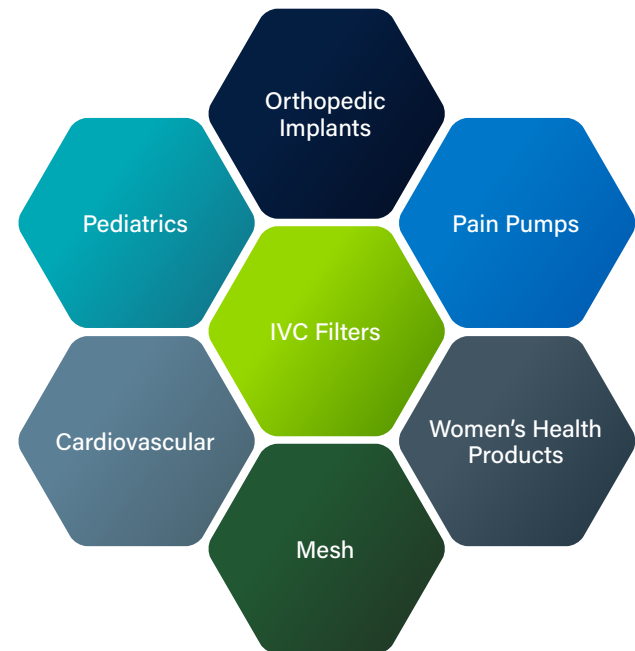

Provide proactive guidance for the full range of employment lawsuits, from discrimination to wrongful termination and everything in between

Corporate

Tactical support and representation in strategic transactions and business decisions including public offerings, product marketing and governance practices

Who Do We Represent?

Connecting You With a Privacy and Cybersecurity Brain Trust

In 2009, our firm helped launch the Medical Device Privacy Consortium (later merged into the International Pharmaceutical and Medical Device Privacy Consortium). This unique association of privacy thought leaders provides a vibrant forum for industry dialogue and consensus-building on data privacy and security issues of common concern and the development of good compliance practices.

Our Track Record
